

Indian Centre for Manufacturing Excellence

14 JULY 2017 | FRIDAY
PARK PLAZA
ZIRAKPUR-MOHALI

A one day Certified Training Session On **Synchronising the Manufacturing Nervous System** via Value Stream Mapping

In today's scenario, Manufacturing Team is continually striving to increase productivity and output of their operations. Their goal is to satisfy the customer with the right product, quality, quantity, and price in the shortest amount of time. With increasing **cost of Manpower, Raw Material Purchase, Energy, Machine & Building Maintenance, Spares cost, Consumables Cost, Inventory carrying Cost, Cost of Quality, Production, Financial & Sales & Marketing Cost; cost Competitiveness** became a very essential parameter today for the survival in the next decade.

The main idea is that an efficient production can be achieved by a comprehensive approach to minimize wastes. This means eliminating excess production and inventory, redundant movement of material, waiting and delays, over processing, excess worker motion, and the need for rework and corrections.

“Your business can only be as lean as your workforce”

Lean has found its way into business in all type of industry – from manufacturing to medical. It is a smarter way of doing business that saves time, money, and resources while reducing waste in Processes. It also provides your customer with greater value in the products they want. However, implementing lean processes requires a workforce that can apply these Tools & Practices in meaningful ways. ICRME Program on “Synchronising the Manufacturing Nervous System” will support Companies to understand the Lean concept in right way and implement in your organisation for resource optimization and meeting your goals and objective.

Key Take Aways

- Improved Efficiency
- Manpower Reduction
- Improved Quality
- Total Employee Involvement
- Bottleneck Identification & Elimination
- Space Saving
- Safer Work Environment
- Improved Employee Morale

Participants Profile

- Plant Heads
- Manufacturing Excellence Heads
- Production-heads
- Quality-heads
- Process Engineering Heads/PPC Heads
- Strategic Planning Heads
- Start Up Entrepreneurs
- Senior Managers

TRAINER'S PROFILE

Ravinder has more than 19 years of experience and has conducted more than 150+ Programs and trained more than 5000 professionals on 5S, 3M, Kaizen, TPM, SMED, Poka-Yoke, TPS, Value Stream Mapping, Flow Manufacturing, Inventory Management, Jishu Hozen, Integrated Quality Management, QCC, LCA & Other Lean tools.

Ravinder is a B.Tech in Mechanical Engineering, Certified TPM Facilitator from JIPM Japan and Certified Business Manager from – Federal Ministry of Commerce & Technology - Germany.
